SUMMARY

MIS Executive with 3+ years of experience in Excel-based automation, inventory reporting, reconciliation, and process improvement for a wholesale mobile phone business handling ₹5–20 crore in monthly stock flow. Built automation that reduced a key daily process from 5 hours to under 10 minutes, improving reporting speed, stock accuracy, and payment control across the business. Strong in Advanced Excel, Power Query, VBA, MIS reporting, inventory control, and operational data management. Prior experience in accounting and compliance at a CA firm.

SKILLS

Automation & Tools

Excel | VBA / Macros | Power Query | Google Apps Script | Pivot Tables | Reporting Automation | AI-Assisted Tool Development

Data Quality & Operations

Data Cleaning | Data Validation | Purchase Order Verification | 3-Way Reconciliation | Vendor Payment Tracking

Reporting & Analytics

MIS Reporting | Inventory Tracking | Stock Reconciliation | Batch Performance Analysis | Dashboard Reporting

Compliance & Workflow

Tally Prime | E-way Bills | E-Invoicing | SOP Documentation | Cross-functional Coordination | Process Improvement

KEY ACHIEVEMENTS

5 hrs → 10 minutes — Built custom VBA and Power Query tools that cut a key daily process from 5 hours to 10 minutes and improved the speed and consistency of reporting.

37 tools built — Designed and implemented a comprehensive automation suite that streamlined stock management, payment tracking, invoice generation, and reporting, effectively reducing manual workflows and enhancing efficiency across core operations.

PROFESSIONAL EXPERIENCE

MIS Executive 10/2022 – Present | Udyog Nagar
Mobile Hub

- Automated daily supplier file processing in Excel and Power Query, reducing turnaround time from 5 hours to under 10 minutes.
- Built a Google Apps Script workflow to collect, categorize, and route 50-100 supplier email attachments per day, eliminating all manual file downloading.
- Developed 37 internal tools, including a 24-module Excel automation suite, reducing manual workload equivalent to two full-time roles across stock management, payments, and reporting.
- Maintained a unit-level master database of purchased devices, including brand, model, condition, price, serial number, and warehouse location, improving stock visibility across 2 warehouses in Noida and Bilaspur.
- Reconciled bills, invoices, and newly delivered stock upon every arrival with original purchase records to ensure 100% compliance on quantity, condition, and pricing agreements.
- Executed monthly 3-way reconciliation across purchase records, delivery data, and live inventory to maintain stock accuracy and prevent payment discrepancies on ₹5–20 crore in stock flow.
- Tracked batch payments, open balances, and customer receipts for up to 1,000 devices across 10 daily sales bills and flagged discrepancies before settlement.
- Analyzed and delivered structured daily, weekly, and monthly sales, purchase, and stock reports to management, providing clear visibility into procurement trends, fluctuating sales volumes, and historical stock trends.
- Created process documentation covering reconciliation logic, file naming rules, workflow steps, and data standards, improving consistency and making handovers faster and easier.

- Maintained daily accounting records in Tally Prime for 100 vendor accounts with zero filing backlogs throughout the tenure.
- Filed monthly and quarterly GST returns on schedule and streamlined preparation using standardised templates, reducing monthly filing preparation time by ~10%.
- Generated E-way Bills and E-Invoices in compliance with GST regulations, maintaining a consistent on-time compliance record.
- Reconciled vendor payment records and maintained complete supporting documentation to ensure audit readiness across all transactions.

TOOLS & SYSTEM BUILT

Instant Device Search Tool

- A desktop search tool that lets the team instantly find any device record across years of purchase data in under 2 seconds — replacing manual file-by-file searching entirely. Built using AI-assisted development.

Automated Email File Collector

- An automated system that scans Gmail, downloads 50–100 supplier attachments per run, and sorts each file into the correct Drive folder by warehouse — replacing hours of manual downloading every day.

24-Tool Excel Automation Suite

- A complete Excel-based automation system with 24 tools covering daily reporting, stock formatting, invoice generation, data exports, and file sharing — all controllable from a custom ribbon with one click.

Price Comparison Tool

- Built an internal price-auditing tool to compare daily supplier stock sheets with master purchase contracts. It identifies pricing errors, mismatches, and duplicate items before payment release, improving billing accuracy and control.

Excel-to-Database Integration Bridge for High-Volume Data Processing

- Built a data integration layer that connects Excel workbooks to a local analytical database engine for faster processing of high-volume inventory and transaction files. It supports batch insertion of 2,500 records and multi-table SQL queries, reducing crashes and manual handling.
